Top Skills

Core Java

Agile methodologies

Selenium Webdriver using Java

SQL

REST API

Postman

Other Skills

Spring Core

Spring MVC

Spring Rest

Spring Security

Spring Data JPA

Spring Boot

Hibernate

Hobbies

Learning new Languages, Technologies, and Tools/Softwares

Installing new Operating Systems on my PC and Android device

Playing Guitar

Solving Rubik's cube

Reading Books

Writing

Mobile Photography

Gaming

Roshan Singh

Summary

Tech enthusiast, whose primary goal is to gain knowledge. Coding being my second love (after Gaming), is a field in which I want to excel. Learning new languages, frameworks is what I like to do in my past time. I wish to, someday, develop something that will be recognized worldwide. I prefer being self-taught over learning from classes. Challenges intrigue me more than my coffee (neither being expendable for me).

Experience

Infosys

Quality Assurance Tester

Oct 2019 – Jan 2022

- Experience in software testing life-cycle in the Agile Framework
- Understanding the business requirements and creating Test Plans, Test Scripts and Test Scenarios
- Creating and demonstrating Test results to the team as well as the client
- Logging and tracking defects in the project management tool Rally.
- Automating test scripts for Regression testing using Selenium
- Created tools so as to ease daily tasks, using Java, Java Swing and Selenium
- Carry out End to End testing, Regression testing, Functional testing
- Use Splunk to check logs as a part of testing
- Fetch Data from the database (as a part of database validation) by firing SQL queries in Rumba Mainframe and IBM Data Studio
- Giving daily status reports in Scrum based environments
- Conducting Knowledge Transfer sessions for new commers
- Raise access for project wide members using the tool I created

Capgemini

Quality Assurance Tester

Jan 2022 – Jul 2022

- Worked on a Project following Agile Methodologies
- Giving daily status reports in Scrum based environments
- Creating Test Cases and developing automation scripts based on the Cases
- Debugging and fixing automated Test Scripts
- Creating XML scripts for test cases which will in turn be used by the Automation script
- Was a part of the Major Testing schedule where I tested around 1000 test cases in a strict time frame
- Carrying out API testing on SOAP UI
- Giving a Demo of the created Test Scripts and the Test cases
- Tracking stories and bugs in Azure board
- Using AQT to fire SQL queries and fetch data from different databases used for testing
- Carry out End to End testing, Regression testing, Functional testing

Computer Association at Pillai College
Member and Head

• Was a member of the Computer Association at the Pillai College of Arts, Commerce, and Science. Where we conducted many IT related events. I conducted several events, seminars, and competitions in the Committee.

IMS Graphics Team at Pillai College
Member

• Was the part of the College Graphics team where I created various posters, banners, brochures for college events.

Education
